

# YOA Permanent Course #2 2010

A new initiative by the Yukon Orienteering Association (YOA) is the creation of a permanent course.

**What:**

The permanent course is set up similar to a score-O event. There are 25 controls of varying difficulty spread all over the map. A marker with a punch attached has been nailed to a tree at each control point. The controls are numbered 1 to 25. At each control simply punch the box on your punch card that corresponds with that control number.

There are no rules for mode of travel! Feel free to run, mountain bike, walk or bring your dog along because it's all for fun.

**Why:**

First priority is fun. Second priority is to help hone your orienteering skills and last but certainly not least is to win some great prizes donated by RPAY! For this course there will be one grand prize (\$15 gift card for itunes). Everyone who participates is entered so just email me and let me know how it went and how many controls you found.

**Where:** Long Lake Map (best place to park is Long Lake Day Use Area)

**When:** Whenever you want! You do not have to collect all the controls at once. You can go out as many times as you like! The permanent course will be set up until the end of August.

**Who:** Anyone using the permanent course must be a member of the Yukon Orienteering Association. Day memberships are available.

**How to get started:** You will need a map and a punch card, which you can download and print from Yukon Orienteering Website.
